

Dr. Charlotte Hodges is Board Certified by the American Board of Surgery. She is an Advanced Laparoscopic General and Bariatric Surgeon who has practiced in DFW since 2011. She has performed over 3000 general and bariatric procedures. Dr. Hodges received her medical degree from Texas A&M University Health Science Center and completed her general surgery residency at Baylor University Medical Center. She is a member of the American Society for Metabolic and Bariatric Surgery, Obesity Medicine Association, Obesity Action Coalition, Texas Medical Association, Dallas County Medical Society and Society of Baylor Surgeons. She is the bariatric director at City Hospital White Rock Lake and is a Center of Excellence surgeon with United Healthcare. She has recently joined the ASMBS Community/Independent Practice Committee. This committee is composed of surgeons working in their communities who focus on setting best standards in these different practice models and hospital environments. She also co-hosted the ASMBS Foundation Walk from Obesity in Dallas in Fall 2018, and plans to co-host annually with City Hospital White Rock Lake.

Dr. Hodges is simply thrilled to be able to offer her patients both medical and surgical weight loss options. She performs all weight loss procedures, including laparoscopic revision bariatric surgery. Dr. Hodges offers general surgery procedures as well, including the following: laparoscopic cholecystectomy, laparoscopic abdominal wall and groin hernia repair, laparoscopic hiatal hernia repair and laparoscopic anti-reflux procedures.

Dr. Hodges made Dallas her home in 2006 when she moved here to begin surgery residency. She met her husband during her fourth year of residency, and they recently added a new little Hodges in 2015! They live in the Park Cities and are actively involved in their local church and community outreach activities. Her husband is a licensed clinical psychologist trained to work in the field of weight loss as well with children and adolescents. He utilizes his skill set in helping New You Bariatric patients achieve weight loss by focusing on the triggers, thoughts and feelings associated with mindless eating.
